

$$\text{---} h \text{---} \text{---} \text{---} \text{---} h \text{---} = \text{---} h \text{---} \text{---} \text{---} h \text{---} + \text{---} h \text{---} \text{---} \text{---} h \text{---}$$

The equation shows the decomposition of a Higgs boson self-energy insertion into two terms. The left side is a Higgs boson line with a dark grey oval representing a self-energy insertion. The right side is the sum of two terms: a Higgs boson line with a top quark loop (labeled  $t$ ) and a Higgs boson line with a top quark self-energy insertion (labeled  $t$ ).
